PART II—SCHEDULE K.

Notification No. 1621/35.

For each additional 100 tons or part of 100 tons above 20,000 tons	3	2	1

TAXES, DUTIES, FEES AND ALL OTHER SOURCES OF REVENUE

The following rules shall be observed in the calculation of fees under this Part :—

1. When a ship previously measured under Rule II is remeasured under Rule I, the full fee in scale (a) is chargeable, without any deduction for measurement under Rule II.

2. The fees for remeasurement in consequence of alterations on the upper deck or in the engine room or under section 77 (4), 78 (2), 79 (1), and 80 of the Merchant Shipping Act, 1894, or section 54 of the Merchant Shipping Act, 1906, are shown in column (c) above. The maximum fee in respect of each item is \$50. The fee for measurement under section 79 (1) (a) (i) includes the inspection of crew spaces if made at the same time as the measurement.

The fee for measurement under section 81, Merchant Shipping Act, 1894, and in all other cases where, in consequence of alterations, remeasurement of the under deck tonnage is found necessary is that stated in column (a) above.

3. In the case of foreign ships applying for the renewal of their Certificates of British Tonnage, the principal dimensions are to be re-tried, and, if they are found to agree with the certificate, a fee of \$20 only will be charged for the issue of the new certificate. If the dimensions do not practically agree with the certificate of tonnage, the ship must be re-measured throughout under Rule I or II, as the case may be, and the proper fees must be charged.

4. In cases of application for the issue or amendment of a "Suez Canal" or "Panama Canal" Special Tonnage Certificate, a fee of two-fifths of the full tonnage fee is to be charged for each certificate whether the measurement is made at the same time as the measurement for British registry or not. This fee includes remeasurement of British tonnage (except under deck) if made at the same time. Certified copies of Suez Canal or Panama Canal Certificates are issued on payment of \$5 each copy.

Where the alteration is of a minor character, it shall be lawful for the Surveyor-General of Ships upon application made in that behalf to direct refundment of part of the fee paid.

5. In the case of a foreign ship originally registered as a British ship, and subsequently seeking re-registry, a fee of \$20 only is to be charged if, on comparison, the principal dimensions are found to agree with the original tonnage formula of the ship. But if they do not agree and the ship has to be measured throughout, a full tonnage fee is payable. If the under deck tonnage is found to agree and the other items differ, then, in addition to the \$20 fee for check measurement, further fees are chargeable for these inspections in accordance with the foregoing regulations.

6. In cases where a ship is being transferred from the British register to that of a foreign country, details of the British tonnage calculations may be supplied for the guidance of the foreign Customs Authorities on payment of a fee of \$5 per sheet with a minimum fee of \$20.

7. In cases where it is desired by the owner of a ship details of the tonnage calculations may be supplied to him on payment of a fee of \$5 per sheet with a minimum fee of \$20.

8. The fee paid in accordance with scale (a) covers any number of visits that the Surveyor may find it necessary to make before he is able to fill up the formula of tonnage and grant his certificate to enable a ship to obtain registry. It also covers the inspection of crew spaces and lights and sound signals, if the Surveyor is able to make these inspections on the occasion on which the measurement is performed, but not otherwise. For any further visits necessary for the completion of inspection of crew spaces and lights and sound signals, further fees in accordance with the law will be charged.

9. The fee for the inspection of minor alteration (*e.g.*, of rig, engines, &c.) is \$10.

Revenue 1934, \$2,020; 1935, \$2,508; 1936, \$2,254; 1937, \$1,832.

LAND TENURE

Singapore.—Land in the hands of private owners in Singapore is held direct from the Crown either by lease or grant. The earliest of the existing titles are the leases for the term of nine hundred and ninety-nine years issued for land in the town soon after the founding of Singapore.

The first lease issued for a period of ninety-nine years, for land in the town, dates back to 1838.

From 1845 onwards a large number of grants in fee simple was issued for land outside the limits of the town though for town lands the issue of leases for ninety-nine years still continued. The margin allowed for the expansion of the town was, however, insufficient, with the result that land in the most densely crowded part of the present town is occasionally found to be held under titles which were originally acquired for agricultural purposes.

After the transfer of the Settlements to the control of the Colonial Office in 1867 the titles issued for land both in town and country were leases for terms of 99 or 999 years, but Ordinance No. II of 1886, now the Crown Lands Ordinance (*Chapter 113*), introduced a statutory form of Crown Title, the present Statutory Land Grant, which is a grant in perpetuity subject to a quit-rent and to various implied conditions and covenants which before the passing of the Ordinance had to be expressly provided for in the document of title itself. This Statutory Grant became then, and until recently continued to be the usual form of title issued but the policy now is to restrict the issue of grants in perpetuity substituting as far as possible leases for terms not exceeding ninety-nine years.

Throughout the Colony.—Temporary occupation of Crown Land is possible under licence for periods not exceeding a year at a time, and similar temporary occupation licences, as well as leases, may be issued for foreshore and sea bed under the provisions of the Foreshores Ordinance (*Chapter 122*).

The following tabular statement shows the Revenue derived in Singapore from Land Rents in the years 1934, 1935, 1936 and 1937 respectively :—

PENANG

Land in Penang and Province Wellesley is held of the Crown, as in Singapore, by grant or lease. The conditions of tenure vary according to the policy of the Government at the time the documents were issued. In Singapore eighteen and in Penang twenty different kinds of title are in the hands of the public. Unoccupied Crown Land is obtainable on Statutory Grants, as in Singapore, and also normally on 99 Year leases. Statutory Grants are also being substituted for permits, expired leases and agreements. Alienation of foreshore is subject to Foreshores Ordinance (*Chapter 122*).

The rates of rent reserved in old leases vary in different localities.

The following table gives a comparative statement of the Revenue derived from Land Rents in Penang in the years 1934, 1935, 1936 and 1937 respectively :—

LANDS

MALACCA

The tenure of a considerable portion of the land in Malacca Town has remained unchanged since the days of Dutch rule. Possession is evidenced in many of these cases by documents of title in Dutch.

The remainder of the land in the Town is chiefly held under leases of 99 years but there are a few leases of 999 years and a few Statutory Grants.

Occupied land in the country is held under Statutory Grants or 99 year leases from the Crown in the case of Estates but small holdings owned by Malays are held under Customary tenure as defined by the Malacca Lands Ordinance. There is special legislation, Foreshores Ordinance (*Chapter 122*), for the alienation of foreshore.

TAXES, DUTIES, FEES AND ALL OTHER SOURCES OF REVENUE

Land is obtainable without premium if held under customary tenure. Land to be held under Grant or Lease is generally sold by auction. The principal land Revenue consists of rents on Grants or Leases and of Mukim Assessment on land held under Customary tenure.

Singapore .. Penang & Province Wellesley .. Malacca ..	Timber Minor Forest Produce Timber Minor Forest Produce Timber Minor Forest Produce	There are no concessions of any importance, all timber and fire-wood being cut by licenced wood-cutters, none of whom work on a large scale. Minor forest produce, including rubber, is also collected under licence or special permit	<p>The area of reserved forest is 81,492 acres as shown in column 4 of the tabulated statement, a decrease of 60 acres from that of 1936 due to alienation for agricultural purposes.</p> <p>A forest officer was stationed in Singapore, his duties being mainly concerned with the development of the local saw-mill industry and timber trade in Singapore. In matters concerning the forests his functions are of an advisory character; the territorial charge remains in the hands of the Commissioner of Lands.</p> <p>An Assistant Conservator of Forests was in charge of the Malacca forests and the Penang and Province Wellesley forests were looked after by a Senior Assistant Conservator of Forests in-charge of Matang district of the State of Perak as a part time charge.</p> <p>The revenue on minor forest produce was chiefly derived from <i>Jelutong</i> and gutta percha with small amounts from <i>rotan</i>, <i>nipah</i>, <i>basong</i> and bamboo.</p>

Japanese ... 1,478 Total ... 4,415	<p>The Japanese employ Diesel engined boats as carriers between their fishing fleets and Singapore. Since 1929 a number of similar boats, but slightly smaller in size, were fitted with trolling booms for tunny fishery. Manned by from eight to ten men, these boats venture out to distant grounds in search of the schools of tunnies and may remain at their fishing grounds for a period ranging between seven and twelve days and then return to port with their catches.</p> <p>Other local boats employed in fishing are undecked open boats varying from the canoe-like "Koleh" about 16 feet long with a beam of 2 feet 9 inches, which are paddled and sailed to junk-like vessels of the "sampan" type about 26 feet long with a beam of 7 feet 6 inches and bearing three masts. These boats are used either in plying to and from fishing Stakes and other traps or carry drift nets, seine nets, hauling nets, long lines baited and unbaited, or the hand line. The majority return to port within the 24 hours, but a few remain out at sea for several days up to, in the case of the Japanese fishing fleets, a month and longer. The Japanese have extended their operations to the Gulf of Siam on the East and to the Mergui Archipelago on the West of the Malay Peninsula. Larger and longer power fish carriers have been constructed and used by the Japanese fishermen for this extended area. Originally about 56 feet, they now reach 76 feet in length.</p> <p>The drift nets are rarely longer than 200 fathoms or more than 6 fathoms deep. Japanese boats use drift nets of 570 fathoms length. Floats made of either "pulai" or "tooi" wood are used. The nets mesh chiefly the local herring, Spanish mackerel, mackerel, Indian Salmon (Polynemus) sardines (Clupea) the dorab (Chironcentrus), sharks and tunny.</p> <p>The seine nets vary in detail, but are usually employed in surrounding a shoal of fish, which are frightened by splashing or other means, so as to gill themselves. They capture the shad (herring) the perch (latescalcarifer) or "cock up" and horse mackerel. The purse seine net is used by Hylam Chinese to catch the Indian mackerel (Scomber kanagurta).</p> <p>The hauling nets are worked, with the exception of a few places where natives of India employ them, entirely by Chinese. They are paid out near the shore in the usual manner and for the size of the boats carrying them are very big measuring from wing to wing 100 fathoms. The catch consists of breams, mullets, sardines, perch, gizzard shad, black trevally, leather jackets, Jewfish, catfish, prawns, cuttle-fish and crabs.</p> <p>Baited long lines (rawai umpan) are paid from small sampan-like boats and canoe-like boats and capture chiefly the Indian Salmon, snapper, rays, sharks, catfish and conger eels. They are usually 200 fathoms long with snoods at intervals of 3 feet with anchors at each end and smaller ones at short intervals.</p> <p>Unbaited long lines are used from the bigger type of sailing junklike fishing boats and capture little else than rays and sharks. Their use is confined to the Chinese. There are a number of other kinds of nets of which the "Pukat Payang" is the most interesting, as being worked on the same principles as the Danish Seine but by hand, the localising of the presence of fish being accomplished by listening under water. It is the solitary approach to anything like the trawl net in these seas.</p> <p>The material of lines and nets is either cotton or ramie, mostly ramie.</p> <p>Nets and lines are made locally but the majority come from China.</p>

Malacca ...	Spanish mackerel	3,122	315,300	<p>The main substance used for proofing is cutch from mangrove bark steeped in water and in a few cases the white of egg mixed with wood oil.</p> <p>In 1922 the Japanese first introduced into Singapore a fishing net called "Moro Ami" in Japanese. This net is peculiar to the Japanese fishermen of the Loo Choo Islands. It employs four sailing boats, two or more power fish carriers carrying ice and provisions to the fishing fleets which remain at sea from one and half to two months, and bringing back the catch preserved in ice.</p> <p>The number of men employed is 32 to 40. The net is set in the neighbourhood of coral reefs with wings stretched towards the direction of the incoming tide and most of the men are engaged in swimming and driving the fish along the edge of the reef into the net. This is accomplished by the concerted movement of the swimmers, each carrying a weighted line with cloth streamer every few feet. These weighted lines with their streamers reach from the surface to near the bottom and are manœuvred through the area between and the seaward wing of the net in ever narrowing circles.</p> <p>The fish mainly caught is bream (<i>Cæsiol</i>) with a small percentage of other kinds of fish.</p> <p>Much of the "wet" fish which comes to the markets is caught in fixed engines of which the main types bear the local names of "Jermal" "Kelong" "Blat" and "Ambai". Wooden stakes varying in diameter from two inches to four inches are embedded in the sea-bed in water varying from 1-5 fathoms, either in one single line or in two lines V shaped and leading to one or more enclosures of poles with a mesh usually of rotan lining in the interior. In the case of "Ambai" the poles lead to a bag net. At certain times of the tide fish move along or between the lines of poles into the enclosures, where various contrivances are employed to bring the fish to the surface, so that they may be bailed out. The "Kelong" in Singapore fish between sunset and 10 A.M. the following morning and during the hours of darkness use a kerosene or carbide flare to attract the fish.</p> <p>The fish mainly captured by stakes are the Spanish mackerel, the dorab, pomfret, mackerel, Jewfish, catfish, skates, leather jackets, anchovies, sardines, silver-breams and "whitebait".</p> <p>In Singapore a large proportion of the fish marketed comes on ice by steamers from the neighbouring Dutch Islands having been caught by fishermen living there and financed by Chinese dealers in Singapore. There are 180 "Kelong" round the island from which the greater part of the locally caught fish come. Other important methods of capture in Singapore are the Chinese hauling nets, the drift nets, the "bubu" a basket trap made of either of bamboo or wire netting, catching seaperch and especially the "ikan merah" (<i>Lutianus</i>) the fish favoured by the European community and hand lines.</p> <p>The markets in Malacca are mostly supplied by fish caught on the Sumatra coast. Sailing sampans take out a load of ice from Malacca and buy at sea, returning to the market with the purchase carefully packed in ice.</p>

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

				DEVELOPMENT IN THE RURAL AREA
Singapore	<p>The development, industrial and sanitary of the rural area continues apace. This is particularly noticeable along highways contiguous to the Municipal Area, or in the vicinity of properties belonging to the Imperial Departments. The ubiquitous shop-keeper is quick to increase his modest income, and the inevitable result of any major undertaking, such as an aerodrome, is a mushroom village in the vicinity. On main highways particularly along Bukit Timah Road and Holland Road building enterprise has been more methodical and substantial and pushed almost to the point of urbanisation.</p> <p>Much of this rural expansion has entailed fresh problems of building control and necessitated expansion of sanitary services.</p> <p>A system of canned food examination was inaugurated during the year. Samples were taken and sent to the Government Analyst. In cases of adverse reports, the defective cans were ordered to be destroyed. On the whole the quality of canned food consumed in the rural area may be said to be good.</p>
Penang	
Malacca	
Labuan	<p>Few if any new areas have been developed in the Rural Districts of Labuan for Agricultural purposes but the Department of Agriculture maintains an Agricultural Experiment Station in the centre of the most developed Agricultural area, for supplying planting materials to native cultivators and for demonstrating improved methods of growing rice and other crops.</p> <p>A Malay School Garden is also operated in the same area.</p>

Notes.—The average number of hours work is not exceeding 8 hours a day. The Workmen's Compensation Ordinance (Cap. 70.) came into force on 1-10-33. Health and Labour Departments are invested with powers under the Labour Ordinance (Cap. 69) to regulate and enforce proper conditions of health and labour. Protection from Machinery is secured under the Machinery Ordinance (Cap. 206).

In Province Wellesley, the only key district in the Colony in which standard wages were in force the prescribed rates for Indian labourers on estates were as follows:—Payable to a male labourer above 16 years—40 cents; Payable to a female labourer above 15 years—32 cents; Payable to children above 10 years—16 cents. The U. P. A. M. agreed, however, that the following rates should be paid on estates throughout Malaya:—For Males—50 cents, for females—40 cents, for children—20 cents for a day's work or equivalent task as provided by section 20 of the Labour Ordinance (Chap. 69). Malays are employed in small numbers in the Colony. They are mostly employed as tappers on a few estates in Province Wellesley and Malacca. They receive lower rates of pay, as a rule, than Tamils, the 1937 figures ranging between 35—50 cents per diem. Javanese comprise a very small part of the labouring population in the Colony, being generally found on a few estates where they receive the same rates of pay as Tamils. They excel as drain cutters

FRIENDLY SOCIETIES

There is no legislation in the Straits Settlements similar to the Friendly Societies Act, 1896, and the Collecting Societies and Industrial Assurance Companies Act, 1896 of Great Britain.

A few societies, although primarily social clubs, include in their objects the provision of death benefits to members or nominated relatives of members in the event of the death of certain specified relatives of a member or the death of a member. The system by which such benefits are provided varies considerably, ranging from a "whip round" among members to a division of the subscriptions raised during a specified time (less a fixed percentage for management expenses) among the nominees of such members as may have died during the period. The amount of benefit varies according to the type of society.

QUESTIONS AND ANSWERS

A. The *number* of vessels naturally depends upon their size, and more particularly length and draught.

The subjoined table of Quayage at the Board's Wharves will afford an indication of the available accommodation :—

Depth of Water at L.W.O.S.T.				Lineal Feet.
25 feet to 30 feet	2,025
30 feet	3,522
33 feet	4,962
35 feet	800

				11,309 Total lin. ft.

A further 1,916 lineal feet of wharf (depth 33 feet L.W.O.S.T.) in course of construction to be completed in 1938.

To cite a recent occasion, the number of vessels berthed at the Wharves was:—
